Sales Pipeline Analytics & Performance Optimization Dashboard

Key Insights:

- **Q2** achieved peak revenue despite a **21%** drop in win rate, indicating performance was driven by deal volume rather than conversion efficiency
- Revenue is highly concentrated, with the top-performing agent generating **9x** more revenue than the lowest performer
- Product performance is uneven, with the GTX series contributing **73%** of total revenue
- A single agent contributes **11%** of total pipeline value, highlighting dependency on individual performance
- Technology sector shows the most balanced performance between revenue and win rate

Executive Overview | Managers Performance | Agent Performance

Sales Trends | Product Strategy | Account Intelligence

⚠ Data Notes:

- 12% of opportunities have missing account data primarily in early pipeline stages (Prospecting & Engaging)

Sales Trends & Performance Drivers

Filter

Q2 achieved peak revenue (3.1M) despite a sharp drop in win rate from Q1, indicating that deal volume — not conversion efficiency — drove performance. Revenue declined in Q3 and Q4 despite stable win rates, suggesting weaker pipeline activity.
